Atrio 7° NEW

Harmony in the Essentials

Resonating the understated philosophy of the Bauhaus movement, the Atrio® faucet collection is one of GROHE's most popular faucet lines. As one of our most comprehensive ranges, it covers all water draw-off points with several product solutions and offers a choice of two distinct handle types. The Atrio line has now been enhanced through the introduction of a full range of single-lever faucets. Repetitive and sensitive use of cylinders, extruded in varying depths and diameters, ensure perfect proportions, superior functionality and continuity throughout the line. The seven degrees inclination of the spout creates a distinctive profile and defines the optimum position for the delivery of water.

Performance Features:

- The smooth, precise action of **GROHE SilkMove®** ceramic cartridge technology for lifelong, effortless water control
- Enhanced even further with **GROHE WhisPer®** Technology – you won't hear anything but the water hitting the bottom of the sink
- **GROHE StarLight®** Technology for a deep, lustrous long lasting chrome finish

Signature elements

“Signature elements” is visual DNA – a design language unique to GROHE. Perfect rings give rise to the cylindrical form from which our faucets are born. The seven degrees inclination of the spout creates a distinctive profile and defines the optimum position for the delivery of water. This subtle incline enhances the user experience and facilitates interaction with our products.

¹ Requires 45 998 rough-in set for floorstanding tub filler sold separately.

² Trim requires a 32 641 two-hole wall mount vessel rough-in valve sold separately.

*To be installed in accordance with local plumbing codes.

ENO = brushed nickel InFinityFinish™
